### MINISTRY OF EDUCATION AND SCIENCE OF UKRAINE

### KYIV NATIONAL UNIVERSITY OF TECHNOLOGIES AND DESIGN

### **EDUCATIONAL PROFESSIONAL PROGRAM**

	DESIGN (by types)	
Level of higher education	second (master's)	
Degree of higher education	<u>Master</u>	
Field of knowledge	02 Culture and Art	
Specialty	022 Design	
Qualification	Master of Design	

### **PREFACE**

DEVELOPED: Kyiv National University of Technologies and Design

### **DEVELOPERS:**

Guarantor of the educational program, **Nataliia Chuprina**, Doctor of Arts, Associate Professor, Professor of the Department of Artistic Designing of Costume, Kyiv National University of Technologies and Design

Members of the working group:

**Tetyana Krotova,** Doctor of Arts, Professor, Professor of the Department of Artistic Designing of Costume, Kyiv National University of Technologies and Design;

**Olena Kolosnichenko,** Doctor of Arts, Professor, Professor of the Department of Artistic Designing of Costume, Kyiv National University of Technologies and Design;

**Dmytro Prasol,** student of the academic group MgDweb-20 of the Faculty of Design of Kyiv National University of Technologies and Design (educational degree - master).

#### **EXTERNAL STAKEHOLDER REVIEWS:**

- 1. Borisov Y.B., Chairman of the Board of the Union of Designers of Ukraine, Ph.D., Associate Professor.
- 2. Pashkevych O.M., President of the Exhibition Federation of Ukraine.
- 3. Dzhumazhanov E.R., General Director of the Union of Jewelers of Ukraine.
- 4. Stranadko E.M., Chairman of the National Union of Photographic Artists of Ukraine.
- 5. Kutsevych V.V., Head of the research architectural center of PJSC "Ukrainian zonal research and design institute for civil engineering (KyivZNDIEP)", Doctor of Architecture, Professor.
- 6. Perevalsky V.E., Academician of the National Academy of Arts of Ukraine, People's Artist of Ukraine, Secretary of the National Union of Artists of Ukraine for Graphic Arts, Professor.

## 1. Profile of the educational professional program Design (by types)

1 – General information									
Full name of the institution	Kyiv National University of Technologies and Design.								
of higher education and	Department of Artistic Designing of Costume.								
structural subdivision	Department of Drawing and Painting.								
	Department of Design.								
	Department of Interior and Furniture Design.								
	Department of Ergonomics and Design.								
Degree of higher education	The level of higher education is the second (master's).								
and qualification in the	Degree of higher education - Master.								
English language	Field of knowledge - 02 Culture and art.								
	Specialty - 022 Design.								
Type of diploma and scope of educational program	Master's degree, single, 90 ECTS credits.								
Availability of accreditation	Certificate of accreditation of the specialty: series ND № 1185355								
	from 27.06.2017, valid until 01.07.2023.								
Cycle / level	National Qualifications Framework of Ukraine is the seventh								
	level								
Prerequisites	Bachelor's degree, or educational qualification level of a								
	specialist.								
Teaching Languages	Ukrainian								
Validity of the educational	Until July 1, 2023								
program	Outil July 1, 2023								
Internet address of the									
permanent placement of the	https://en.knutd.edu.ua/ects/2021/op-fd/

educational program									
educational program description									

### 2 – The purpose of the educational program

Training specialists who have deep knowledge, as well as basic and professional competencies in the field of design; formation and development of general and professional competencies in the field of design (with various objects of professional activity), aimed at the student's gaining: the ability to master the methods of content and social scope of the project, methods of theoretical and practical work, content of project activities, requirements for complex design projects.

The main goals of the program are: the formation of specialists capable of solving complex problems and practical problems in the field of design or in the learning process, which involves research and design research and / or innovation and is characterized by uncertainty of conditions and requirements.

and requirements.														
	3 – Characteristics of the educational program													
Subject area	The program is focused on the applicants' formation of competencies to													
	acquire deep knowledge, skills and abilities in the specialty.													
	Compulsory educational components - 73% of which: disciplines of ger													
	training - 6%, vocational training - 50%, practical training - 16%, learning													
	foreign language - 3%, diploma design - 23%. Disciplines of free choice of													
	students - 27% are selected from the university catalogue in accordance with													
	the approved procedure at the University.													
Orientation of the	Educational professional program for master's degree preparation.													
educational														
program														
The main focus of	The program has a professional, research and applied orientation. It is based on													
the educational	well-known project results, taking into account the current state of design,													
professional	focuses on current specializations, within which further professional and													

#### scientific career is possible. The emphasis is placed on the formation, program development of professional competencies and the study of theoretical and methodological provisions, organizational and practical tools in various fields of design; organization of the project creative process, application of heuristic methods aimed at overcoming creative problems, development of professional selfimprovement, creative thinking, and search for non-standard project solutions. The program develops the ability of analytical experimental and associative creative work in generating fundamentally new design ideas in various fields of design (depending on the chosen professional direction) and the formation of modern ideas about the basic laws and achievements in design, modeling, structural and artistic decoration of complex design objects and design projects (in various fields of design). The program focuses on current specializations and professional areas, within The program which further professional and scientific activities are possible. Professional features directions within the educational professional program are: clothing design (shoes); graphic design; environment design; industrial design etc. The program develops prospects for participation and internships in the structure of National Creative and Design Foundations, such as the National Union of Artists of Ukraine, the Union of Designers of Ukraine, the Union of Architects of Ukraine and others. Students have prospects for internships and presentations of their creative works in the framework of international projects, both competitive and in the framework of international film, TV projects and mass media. 4 – Suitability of graduates for employment and further training Applicants are able to work in education institutions of art, design institutions in Suitability for various fields of design, creative and production companies, institutions of creative employment and artistic profile. Specialists are able to perform professional work as a designer, art director, professional consultant, artist, fashion designer, art critic in design and architectural bureaus, advertising agencies, media, television, companies, small businesses working in the textile industry, fashion industry, industrial design, printing, information and telecommunications, in the fields of art, science and technology, education, entertainment and recreation. A designer can hold the following primary positions\*: chief designer (industrial designer), research designer, landscape designer, designer (art designer), graphic designer, furniture designer, interior designer, clothing designer, packaging designer, designer of industrial products and objects, head of an amateur association of applied and decorative arts, member of the board (art-expert), head (of the studio by types of art and artistic creativity, amateur association, club of interests, etc.), teacher at institutions of higher education, assistant, teacher of vocational school, researcher (teaching methods), researcher (in other fields of study), costume designer, stylist, decorator, font artist. \*educational qualifications can be combined (for example, interior and furniture designer, accessory and jewelry designer). Lifelong learning to improve professional, scientific and other activities. **Further training** Possibility to continue studying according to the programs of the third (educational-scientific) level of higher education (doctor of philosophy). Opportunity to obtain a second higher education with a master's degree, which expands the prospects of a professional career. 5 – Teaching and assessment **Teaching and** Student-centered, practice-oriented learning, self-learning, problem-oriented learning are used. The system of methods of problem-based learning is based on learning the principles of purposefulness, binary (direct interaction of teacher and student); it consists of demonstrative, dialogical, heuristic, research methods. Historical, terminological, functional, systemic, cognitive approaches, generalization and modeling are used in teaching thematic material of relevant disciplines. Forms of organization of the educational process: lecture, practical lesson; individual work; consultations, development of professional complex design projects; practical training. Exams, tests, surveys, oral presentations, reports, written essays, tests, term papers Assessment (project) work, master's thesis.

			6 – Program competencies								
Integral		The abil	ity to solve complex problems and issues in the field of design or in								
Compete	nce (IC)		ning process, which involves research and/or innovation and is								
•	` ,		rized by uncertainty of conditions and requirements.								
General		GC 1	Ability to generate new ideas (creativity).								
competer	ncies (GC)	GC 2	Ability to identify, pose and solve problems.								
	((	GC 3	Ability to communicate with representatives of other professional								
		000	groups at different levels (with experts from other fields of								
			knowledge/types of economic activity).								
		GC 4	Ability to work in an international context.								
		GC 5	Ability to develop and manage projects.								
		GC 6	Ability to act socially responsibly and consciously.								
		GC 7	Ability to communicate in a foreign language.								
Professio	mal	PC 1	Ability to carry out conceptual design of facilities taking into								
	ncies (PC)		account functional, technical, technological, ecological and aesthetic requirements (by specialization).								
		PC 2	Ability to conduct project analysis of all influential factors and								
			components of design and formation of the author's concept of the project.								
		PC 3	Ability to understand and use causation in the development of design and contemporary arts.								
		PC 4	Ability to protect intellectual property for works of fine art and								
			design.								
		PC 5	Possession of theoretical and methodological principles of teaching								
			and integrated approaches to professional training of designers;								
			planning of own scientific and pedagogical activity.								
		PC 6	Ability to apply in the practice of design expressive artistic and plastic properties of different types of materials, innovative methods and technologies.								
		PC 7	Ability to use special drawing and painting (by specialization), as well as methods of using computer hardware and software.								
		PC 8	Ability to conduct effective economic activities in the field or design.								
		PC 9	Ability to create a market-demanded and socially responsible design product (goods and services).								
		PC 10	Ability to convincingly demonstrate to the consumer the attractive								
			cultural value and economic value of the done creative product.								
	. , ,		7 – Program learning outcomes								
	lge and und		0

		TOTAL EDUCATIONAL PROFESSIONAL PROGRAM	90	<u> </u>	

2.2 Structural and logical scheme of preparation of the doctor of philosophy of the educational professional program "Design"

3. Certification form of applicants for higher education

	11 8
Attestation	Attestation of a graduate of an educational program is carried out in the form of
forms of	public defense of a master's thesis (research and design part).
applicants for	The master's thesis involves the independent solution of a complex problem or
higher education	complex issue in the field of design, which involves research and innovation and
	is characterized by uncertainty of conditions and requirements.
<b>Document of</b>	Diploma of awarding a master's degree with the conferral of a qualification:
higher education	master of design
