PREFACE

DEVELOPED: Kyiv national university of technologies and design

DEVELOPERS:

Guarantor of the educational program **Derkach Tetiana Mychailivna**, doctor of pedagogical sciences, professor, head of the department of vocational education in technologies and design of Kyiv national university of technologies and design.

Workgroup members:

Vodzinska Oksana Ivanivna, candidate of technical sciences, associate professor, associate professor of the department of technologies and construction of garments of Kyiv national university of technologies and design;

Vnukova Olha Mykolaivna, candidate of pedagogical sciences, associate professor, associate professor of the department of vocational education in technologies and design of Kyiv national university of technologies and design;

Kalinina Anastasiia Vitaliivna, student of the fashion industry faculty of Kyiv national university of technologies and design.

EXTERNAL STAKEHOLDER RECENSIONS:

1. Horbatiuk N. A., director of Kyiv Higher Vocational School of Sewing and Hairdressing Art;

2. Petrovych S. M., acting director of the Kyiv Higher Vocational School of Technology and Clothing Design;

3. Shchutska G.V., director of the Kyiv Professional College of Applied Sciences.

4. Yaroshchuk T. V, teacher of special disciplines of Kyiv Higher Vocational School of Technology and Clothing Design;

5. Fadieeva N. M., teacher of special disciplines of Kyiv Professional College of Applied Sciences.

1. Profile of the educational -professional program <u>Vocational education (Technology of light industry products)</u>

	1 – General information										
Full name of the high	11										
education institution an	\mathbf{d} Kylv national university of technologies and design.										
structural unit	Department of vocational education in technologies and design.										
Higher education deg	ee Level of higher education – the second (master's).										
and qualification in t	he Degree of higher education – master.										
original language	Field of knowledge – 01 Education / Pedagogy.										
	Speciality – 015 Vocational education (by specializations).										
	Specialization – 015.36 Vocational education (Technology of light										
	industry products).										
Type of diploma a	nd										
volume of the education	al Master's degree, unitary, 90 ECTS credits.										
program											
Availability of	Certificate of accreditation of the educational program UD №										
accreditation	11007731 of 08.01.2019.										
Cycle/level	The National Qualifications Framework of Ukraine – the seventh										
	level.										
Prerequisites	Bachelor degree.										
Language of instruction	Ukrainian										
Term of the educational	Till the 01 of July 2024 p.										
program

the description of the											
educational program											
	2 – The goal of the educational program										
To train specialists who ha	ve professional competencies in the fields of vocational education and										
fashion industry, are able to	solve complex problems and to implement innovations in professional										
activities in the specialty 0	36 Vocational education (Technology of light industry products).										
The main goals of the pro-	am are: formation of abilities to carry out educational process in										
vocational education ins	itutions of sewing profile, to establish effective psychological-										
	h applicants of vocational education, to show professional knowledge										
and skills in the content an	d methods of teaching general technical and special disciplines, as well										
as the use of educational te											
	Characteristics of the educational program										
•	he program is focused on applicants' competencies forming for the										
	quisition of profound knowledge, skills and abilities in the speciality.										
	ompulsory educational components – 73 %, of which: disciplines of										
	neral training - 9% (including learning of a foreign language - 4.5%);										
	ofessional training - 91% (including practical training - 32%, diploma										
	sign - 32%). Disciplines of free choice of students - 27% are selected										
	om the university catalogue according to the approved procedure at the										
U	niversity.										
OrientationofEeducational program	lucational- professional for master's training.										
	nphasis is placed on the formation and development of the										
	mpetencies in the field of vocational education, the study of theoretical										
	d methodological provisions, organizational and practical tools for the										
	alization of educational activities in vocational education institutions in										
	e field of fashion industry.										
UI	. 11010 01 105111011 1110050 y.										

Peculiarities of the												
educational program	an active research environment, as well as in a real environment of future											
	professional activity, focused on the implementation of real projects on the technology of germents menufacturing and training of personnal for											
	the technology of garments manufacturing and training of personnel for the fashion industry.											
	itability of graduates for employment and further study											
Suitability for	The graduate is suitable for performing of scientific, educational,											
employment	analytical, expert, counselling, managerial, cultural-educational activities											
emproyment	in the field of education. May hold the following positions: teacher of											
	vocational training, teacher of general-technical and special disciplines in											
	the vocational and extracurricular education institutions, technologist-											
	mentor, head of industrial practice, vocational consultant, instructor of											
	personnel training in production, methodologist in educational institution,											
	administrative employee of vocational education institution, out-of-											
	school educational institution, advanced training centres; research											
	engineer of scientific organizations in the field of light industry, engineer-											
	constructor, engineer -technologists, production preparation engineer,											
	head of production units of garment enterprises. The graduate is suitable											
	for employment in enterprises, organizations and institutions operating in											
	the fields of vocational education and light industry.											
Further training	Lifelong learning to improve professional, scientific and other types of											
	activities. Opportunity to continue training in the educational-scientific											
	program of the third (educational-scientific) level of higher education (doctor of philosophy) and to acquire additional qualifications in the											
	system of adult education.											
	5 – Teaching and evaluation											
Teaching and	Student-cantered and problem-oriented learning, learning through											
learning	industrial and prediploma internship and self-study are used. The system											
8	of teaching methods is based on the principles of purposefulness, binary											
	direct active participation of a research-teaching staff and a higher											
	education applicant.											
	Forms of organization of the educational process: lecture, seminar,											
	practical class, practical training, self-study, consultation, development of											
	professional projects (works).											
	Personal and activity approaches in dialectical unity are used, which											
	direct students in the educational process to the personal development of											
	and their self-realization.											
	The competency approach enables the development of competencies											
	The competency approach enables the development of competencies necessary for a future specialist for his successful professional activity.											
	The competency approach enables the development of competencies necessary for a future specialist for his successful professional activity. Due to the individual-differential approach, the identification and
